

REMARKS

This Response responds to the Restriction Requirement dated February 20, 2007.

The examiner has identified three species, species I through III, which correspond to figures 12-14 respectively, however, the examiner has not identified which claims correspond to each of these species. Applicant elects species I and has determined that claims 1-3, 7-9, 11, 13-24, 28 and 29 correspond to the elected species. Other claims are withdrawn from consideration pending determination of patentability of generic claims.

Respectfully submitted,

/Scott C. Krieger/
